COMPANY PROFILE & PRODUCTS

Trailblazers in Natural Mineral Medicine
Promoting an Authentic Well-Being Lifestyle

INTRODUCING KADESH INC.

Kadesh Incorporation, a research-oriented cosmetic and homeopathic company, has dedicated 20 years to the industry. Our most significant achievement is the development of Purition mineral water, a natural therapeutic remedy created from mineral species known for their healing properties and health benefits. This mineral water serves as a primary ingredient in many of our products.

Based in Garden Grove, California, and Seoul, South Korea, our company is expanding globally to cater to the needs of our diverse customers seeking our unique mineral solution. We conduct research and laboratory tests in collaboration with various certified research centers and facilities, including UC Irvine, Adamson Analytical Laboratories, Utah State University, Dongshin University and Wonkang University.

COMPANY FOUNDER & CEO

DR. DAVID KWANG HO KIM

Kwang Ho Kim established Stanton University in the United States in 1996 and has been serving as its president until now. While researching homeopathic medicine at the Korean medicine department within the university, he opened the door to stone mineral medicine. In a systematic research environment encompassing Western and Oriental medicine, he succeeded in developing Puriton, the culmination of stone medicine, after more than 22 years of research. Various researchers at the Puriton Research Institute are continuously producing remarkable results in developing therapeutic substances using Puriton for antiviral treatments, AIDS, black fungus, cancer, and skin diseases. Currently serving as the CEO of Kadesh Incorporation in both the United States and Korea, the author is creating new waves in the pharmaceutical and food industries by developing homeopathic medicines, medical products, health supplements, functional cosmetics, and pharmacopuncture products.

WHAT WE DO

Research & Development

- Conducting Lab Tests
- Discover mineral's medicinal efficacies
- Works with international Research (including US FDA Authorized labs and University Labs)

Product Development

- Homeopathic (Korean Traditional Medicine)
- Skincare / Beauty
- Dietary Supplement
- Pet Care

Whole / Retail Sales

- Distribute Homeopathic Medicines to Oriental Medicine Clinics
- Wholesale & Retail sales of signature products.

Mineral Healing, the Discovery of Ture Medicine

Kadesh Inc. is a company that brings you the most innovative natural healing experience through Mineral Science.

In our 20 years of research on therapeutic minerals, we have discovered a 100% natural mineral extract named “Puriton” which extraordinarily enhances human’s innate healing ability when applied to human bodies.

Puriton is the key ingredient of Kadesh Inc’s homeopathic, beauty, and dietary supplement products, and is also the brand embracing all the Puriton-containing products.

PURITON MINERAL

Puriton is the most desired medicinal substance that every human being dreams of for a healthier life. This steroid-free, natural substance presents magnificent healing ability when used on the human body. The 20-year-long journey of researching natural minerals and their medicinal properties gave birth to Puriton, which is now used in various human and pet products for their well-being.

Puriton's Features

What Does Puriton Mineral Water Do?

All-Natural / Free of Chemical Substances

Pure liquid with ultra-fine particles extracted from stone mineral with multi-faceted healing and health improving abilities

Exterminate Harmful Bacteria and Viruses

Puriton has shown bactericidal and virucidal efficacies on 18 bacterium and 6 virus kinds.

Skin Renewal & Wound-healing Effects

Puriton treats wounds and promotes skin renewal more effectively than generic drugs.

Supports the Immune System

Puriton proliferates lactobacillus (beneficial bacteria) and immune-fortifying cells.

Eliminate Cancer Cells

Puriton is proven to inhibit cancer cells' growth, and has shown its anti-cancer property with breast cancer, lung cancer, melanoma, renal cancer, prostate cancer etc.

KILLS HARMFUL BACTERIA

1. Analysis

AAL compared various bacteria growth between purified water and water sample (M1606100023) over a period of 24 hours and 7 days for a microbial challenge. AAL exposed a varying quantity (CFU/mL) of five different strands of bacteria:

1. *Escherichia coli*
2. *Staphylococcus aureus*
3. *Pseudomonas aeruginosa*
4. *Salmonella typhimurium*
5. *Candida albicans*

5. Summary

- 1) Puriton has 40% of cell proliferation inhibition of PC3 cells compare to H2O at 50 % treatment. At 70% Puriton treatment to PC3, Puriton has 0% cell survival.
- 2) Puriton at 30% treatment for 3 days has 5-10% PC3 cell viability.
- 3) Puriton at 70% treatment for 3 days has 99% OVCA429 cell growth inhibition.
- 4) Puriton has 70% and 99% HL60 cell growth inhibition respectively compare to H2O at 50% and 70% treatment for 3 days.
- 5) Puriton has 20% and 99% A375 cell growth inhibition compare to H2O at 50% and 70% treatment for 2 days.
- 6) Puriton has 90% RCC (-), renal cancer cell growth inhibition compare to H2O at 70% treatment for 2 days.

Puriton has demonstrated anti-cancer efficacy by effectively inhibiting the growth and **killing 99% of breast, liver, lung, ovarian, kidney, leukemia, and skin (melanoma) cancer cells**. At the same time, it has been shown to **preserve and proliferate immune cells that fight against cancer cells**.

Virucidal Efficacies

Abstract: In 2016, infectious microbes were one of the leading causes of death, especially in developing countries. Puriton® is a mineral mixture consisting of biotite, kaolinite, montmorillonite, serpentine, clinocllore, and vermiculite, and evaluated antimicrobial activity in vitro and safety in vivo. Nine pathogens and opportunistic bacteria, namely *Salmonella typhimurium*, *Escherichia coli*, *Pseudomonas aeruginosa*, *Alcaligenes faecalis*, *Staphylococcus aureus*, *Enterococcus faecalis*, *Micrococcus luteus*, *Mycobacterium smegmatis*, and *Bacillus subtilis*, and the two viruses Zika and Influenza A/Duck/MN/1525/81 were used. A 26-week oral repeated safety study of Puriton® was conducted. Puriton® suppressed the bacterial proliferation, with a minimum proliferative rate of 91.1% in *B. subtilis* ATCC6633. The virucidal efficacy of Puriton® against Zika virus after 4 h and 18 h of contact time was significant in all groups treated with Puriton®. Twenty-six-week repeated oral administration of Puriton® was considered safe based on physiological results, such as behavior and blood cells/chemistry, and histopathological changes in the brain, heart, kidney, liver, and lung. We concluded that Puriton® exerted bactericidal and virucidal efficacies and was safe for 26-week repeated oral administration.

1. Introduction

In May 2018, the World Health Organization reported the top 10 causes of death in 2016 [1]. Although there was a difference in economic status between developed countries and developing countries, divided as low-income countries, lower-middle-income countries, upper-middle-income countries and high-income countries, the common death causes worldwide were bacterial infections. There were several deaths causes which were directly originated by microorganisms such as malaria, tuberculosis, and diarrheal diseases. In 2012, 2195 children died every day due to infected diarrhea, more than AIDS, malaria, and measles combined [2].

Bacterial infection results from the pathogenicity of bacteria. *Salmonella typhimurium* [3] and *Escherichia coli* [4] incur foodborne outbreaks, whereas *Pseudomonas aeruginosa* is related to many

Abstract

In 2019, 262 million asthma patients were estimated, with 455 thousand deaths caused by asthma. It is an incurable chronic inflammatory respiratory disease and is more severe in the elderly and in the young. Forty BALB/c mice were divided into 5 groups of eight mice each: vehicle group (CON), asthma group (OVA), positive drug group (DEX), and Puriton (700 and 1400 µL/head/day). After animal experiment all mice were narcotized for collecting bronchoalveolar lavage fluid (BALF) and blood and then anesthetized for sampling the lungs. White blood cell (WBC) and differential count in BALF and immunoglobulin E (IgE) in serum were measured. Lung tissues were used for histopathological and immunohistopathological studies. Treatment with Puriton decreased the populations of WBC and neutrophil and the level of IgE. It prevented OVA-induced morphological changes in the lung and increased the expression levels of T helper 2 (Th2) cell-related cytokines such as interleukin- (IL-) 4, IL-5, and IL-13. It inhibited inflammatory cytokines such as tumor necrosis factor alpha (TNF-α) and IL-6. The nuclear factor kappa-light-chain-enhancer of activated B cells (NF-κB)/ cyclooxygenase-2 (COX-2)/ prostaglandin E2 (PGE₂) pathway is a significant inflammatory pathway. Treatment of the subjects with Puriton resulted in the inhibition of the expression of phosphorylated (p)-NF-κB, COX-2, and PGE₂ in both the nucleus and cytoplasm. From the results we concluded that Puriton is a promising drug candidate as asthma treatment.

Introduction

Asthma is a chronic inflammatory hyperresponsiveness in respiratory system which is caused by indoor allergens such as house dust mite, cockroaches, and pet dander and outdoor allergens such as mice, pollen, peanut protein, and mold [1–3]. Symptoms of asthma include wheeze, shortness of breath, chest tightness, and cough

Puriton Skin Protectant

Treatment on Skin Inflammation with Puriton

We have applied Puriton on the skin inflammation. Once the patient faced the severe skin inflammation, we have applied Puriton spray (Puriton Skin Protectant) for a week. The second photo shows the treatment process in 1 week, and the third photo shows the cured condition after a full week of treatment with Puriton.

After 1 month

퓨리톤샴푸 자극없이 넘촉촉하네요
피부가 안좋았는데
자극없어서 잘 사용중이에요
산책 후 씻기니
자극이 없어서인지 목욕 좋아하는 애가
털도 보들보들
넘 마음어려요
반려견샴푸
퓨리톤으로 정했당

올 땡땡이 눈은 예민해서 잘못 사용하면
오히려 아이 눈에 자극이 가서 안좋은데
요 제품은 순해서 그런지 매일 사용하고있는데
눈에 자극없이 깨끗하게 눈물자국.
눈곱.이물질 제거를 할 수 있었습니다!

눈에 이물질을 깨끗하게 닦아주니
눈물 특유의 꼬순내도 없어지면서
눈 주위가 점점 개선되는것 같아요

요 제품을 사용하기 전에는
아이가 눈 주위를 긁는 행동을 했었는데
요즘은 그런 행동을 보이지 않더라고요!

처음 사용해본 제품인데 올 땡땡이에게 잘 맞는것같아
꾸준히 사용해보려고 합니다!

(2023-11-04 스마트스토어에서 등록된 구매후기)

구매하고 한 통 거의 다 썼는데 효과가 너무 좋아서 후기 남깁니다-

우리 집 강아지가 등 쪽에 검은 피부 딱지가 자주 생기는데, 매번 목욕 시킬 수도 없어 연고도 발라보고 빗질도 자주 해줬는데 호전이 없어 고민이 많았는데,

아는 지인의 추천으로 구매해서 꾸준히 뿌려주었는데 딱지가 점점 흐려지고 잘 안 생겨서 매우 매우 만족합니다 ㅎㅎ

전후 사진으로 보니 더욱더 효과가 잘 보여서 뿌듯하네요 ㅎㅎ 사용 전 사진에 있던 검은 딱지가 사라지고 피부도 훨씬 좋아진 것 같아서 만족합니다!

남은 한 통 마저 다 사용하면 조만간 재구매하러 올게요! 너무 좋아요! 추천합니다!
